

PROJECT BACKGROUND AND STATUS

GLNG Gas Transmission Pipeline, QLD, progressive rehabilitation of pipeline right of way

Project overview

Hunter Gas Pipeline (HGP) Pty Ltd is now a wholly owned subsidiary of Santos. The proposed underground pipeline route passes close to Santos' Narrabri Gas Project (NGP). The goal is to work with infrastructure developers and landholders to construct a pipeline that will deliver much-needed gas to the east coast domestic market in the shortest timeframe possible.

The 833-kilometre pipeline already has planning approval from the NSW and Queensland governments. Once constructed, it will potentially connect the Wallumbilla Gas Supply Hub in Queensland to NSW, providing a second route to southern markets for Queensland gas and adding competition to the domestic market.

The HGP has been designed with offtake points at various regional towns along the route, and the corridor was selected to ensure minimum impact on communities, landowners, and the environment. Santos will assess the requirements to transport hydrogen with consideration for the existing pipeline network and future customer demand as it evolves during the energy transition.

Project status

Santos continues to engage with the directly affected landholders, local councils and state government agencies to finalise the current pipeline alignment within the 200m approved corridor.

The exact location of the pipeline and the permanent 30-metre construction right-of-way will continue to be refined, taking into account constructability and environmental considerations, and landholder feedback identified in the survey work. Site survey work has commenced in some areas.

The Santos team continue to meet with landholders seeking permission to gain property access to conduct these investigations and to discuss negotiations regarding the proposed easement for the project. The pipeline is expected to commence construction once the route is finalised and all secondary approvals are in place.

PROJECT FACTS

833

Km of underground pipeline

100

per cent of Narrabri gas will go to domestic market

up to **200**

TJs/day of Narrabri gas delivered to the domestic market

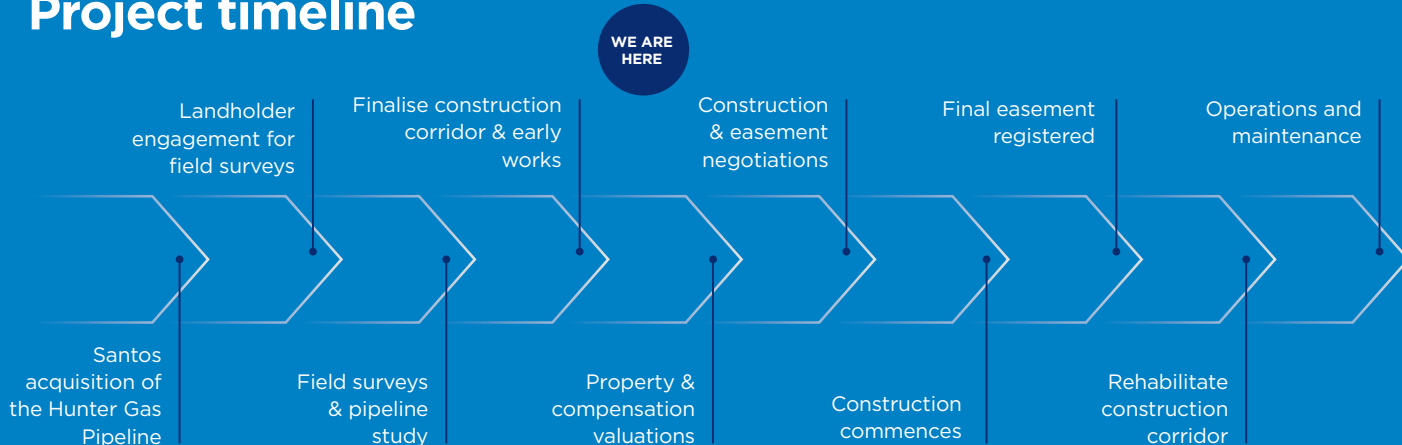

350

construction jobs

HUNTER GAS PIPELINE

Project timeline

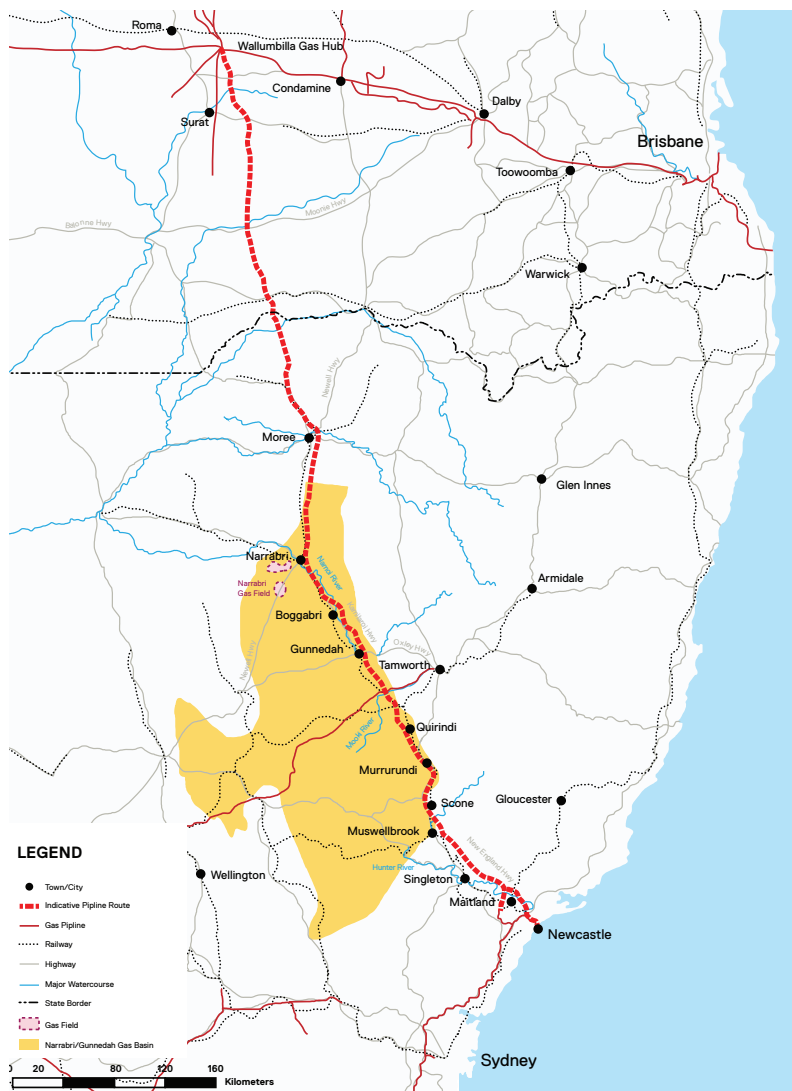

A proudly Australian natural gas company

Santos is an important Australian domestic gas supplier. For 70 years, Santos has been working in partnership with local communities, providing jobs and business opportunities, safely developing natural gas resources and from there powering industries and households.

Santos has been supplying natural gas to NSW customers since 1976 and has been operating in the state since 2007.

Our NSW assets include the Narrabri Gas Project (NGP), with 100 per cent of Narrabri gas committed to go into the domestic market. Locally, the project is expected to provide up to 1,300 jobs during construction, 200 ongoing local jobs and deliver significant economic benefits to the region.

Once fully operational, the NGP has the potential to deliver more than half of the natural gas that goes into the NSW market each day, ensuring people in NSW receive locally produced gas creating a more secure and affordable supply for families and businesses.
